

Data Collection and Preprocessing Phase

Date	18 June 2025
Team ID	SWTID1749707061
Project Title	Online Payments Fraud Detection using Machine Learning
Maximum Marks	2 Marks

Data Quality Report:

The Data Quality Report will summarize data quality issues from the selected source, including severity levels and resolution plans. It will aid in systematically identifying and rectifying data discrepancies.

Data Quality Report:

Data Source	Data Quality Issue	Severity	Resolution Plan
Kaggle Dataset	Class imbalance – very few fraud cases vs. majority legitimate	High	Use SMOTE, ADASYN, or class weighting during model training to balance the classes.
Kaggle Dataset	Missing values in <code>oldbalanceOrg</code> , <code>newbalanceDest</code> columns	Moderate	Impute missing values using domain knowledge or drop rows if imputation isn't reliable.
Kaggle Dataset	<code>type</code> column is categorical but not encoded	Low	Use Label Encoding or One-Hot Encoding before feeding to the model.
Kaggle Dataset	Presence of duplicate transaction records	Moderate	Identify and remove duplicates to prevent skewing the model.
Kaggle Dataset	Outliner	moderate	Use <code>transformationPlot</code>
